

Exam : 2V0-62.23

**Title : VMware Workspace ONE
22.X Professional**

Version : DEMO

1.With Workspace ONE UEM staging, what are the three supported enrollment options for Android devices? (Choose three.)

- A. Sideload
- B. QR Code
- C. Web
- D. NFC
- E. Barcode

Answer: B, C, D

Explanation:

For Android devices, Workspace ONE UEM supports various enrollment options that facilitate easy and secure device management. The supported options include QR Code, Web, and NFC. QR Code enrollment involves scanning a specific code to start the enrollment process. Web enrollment allows users to enroll their devices via a web browser. NFC (Near Field Communication) enables device enrollment by simply tapping the device against another NFC-enabled device.

2.DRAG DROP

Match the Workspace ONE Service on the left to its Service Port on the right.

WS1 Service

Service Port

Secure Email Gateway		10443
Content Gateway		8443
VMware Tunnel		11443

Answer:

WS1 Service

Service Port

Secure Email Gateway	Content Gateway	10443
Content Gateway	VMware Tunnel	8443
VMware Tunnel	Secure Email Gateway	11443

3.Refer to the exhibit.

Access Denied

Access denied. Unable to authenticate the user.

A user has attempted to launch an iOS application and during authentication they see this response. What is the cause of the issue?

- A. The user does not have access to that application
- B. They installed the application from the Apple App Store
- C. You need to add the identifier to the Mobile SSO profile
- D. The user put in the wrong email address

Answer: C

4. Which two email clients can be configured with an Exchange ActiveSync profile? (Choose two.)

- A. Microsoft Outlook
- B. Workspace ONE Boxer
- C. macOS native email client
- D. Gmail
- E. iOS native email client

Answer: A, B

Explanation:

Workspace ONE UEM supports the configuration of Exchange ActiveSync profiles with specific email clients. Microsoft Outlook and Workspace ONE Boxer are the two clients that can be configured with these profiles. Microsoft Outlook is a widely used email client, and Workspace ONE Boxer is a customized email client designed for Workspace ONE, offering integrated security and management features.

5. During an enrollment attempt, a user enters their email address in the initial field in the Intelligent Hub. The user receives an error stating, "Something went wrong with discovery".

Which configuration setting can be enabled to allow end users to enter an email address instead of a Server URL?

- A. Allow only known users
- B. Enrollment Token
- C. Autodiscovery Enrollment
- D. Pre-Register devices

Answer: C

Explanation:

The error encountered during enrollment due to entering an email address suggests a need for enabling Autodiscovery Enrollment. This feature allows users to enroll their devices using their email address by automatically discovering the appropriate server settings, thereby simplifying the enrollment process and reducing user errors.
