Exam : **CPRE-FL_Syll_3.0**

Title : IREB Foundation Level (CPRE FL)

Version : DEMO

1.You are project manager for a system that your company is creating for the military in the field of logistics. A requirements engineer has been assigned to your project but does not have all the desirable skills for this role. In respect to the attributes of the requirements engineer, which of the following statements implies the greatest risk for the requirements engineering? (1 Point)
A. The requirements engineer is not familiar with the military ranks and so cannot deal adequately with the hierarchical sensitivities.
B. The requirements engineer does not have detailed knowledge of the military norms and standards that should be applied to the system.
C. The requirements engineer has no solid project management training.
D. The requirements engineer is introverted and has no knowledge of requirements elicitation and documentation.
Answer: D

2.Which of the following statements best characterizes the relationship between a requirements engineer and a stakeholder in the role of a tester? (1 Point)
A. The requirements engineer delivers input for the work of the stakeholder.
B. The output from the requirements engineer is managed by the stakeholder.
C. The stakeholder delivers input for the requirements engineer.
D. The stakeholder monitors the work of the requirements engineer.
E. The work of the requirements engineer is not related to the role of the stakeholder.
Answer: A

3.Which sentence best characterises the term "stakeholder"? (1 Point)
A. The external actors interacting with a system and the technical interfaces to surrounding systems are designated as stakeholders.
B. Stakeholders are persons and organisations affected by the development and the use of the system or of the product.
C. Stakeholders are special interest representatives who are responsible for the approval of the first project phase.
D. A stakeholder is responsible for the administration of the software development environment.
Answer: B

4.You are assigned to carry out and document a system and context delimitation for a software system that is to be developed.
What diagram is least suited for the representation of the delimitation? (1 Point)
A. Class diagram
B. Use case diagram
C. Statediagram
D. Context diagram with data flows
Answer: C

5.According to the Kano model, there is a particular category of system attributes that has an almost linear relationship between satisfaction and degree of compliance.
For which category is this so? (1 Point)

A. Basic attributes
B. Performance attributes
C. Excitement attributes
D. Needs
E. Goals
Answer: B
