

Exam : D-VXR-DS-00

Title : Dell VxRail Design Exam

Version : V8.02

1.Which components are typically part of a VxRail cluster design? (Choose two)

- A. Management switch
- B. Witness node
- C. Hypervisor license
- D. Fibre Channel adapter

Answer: AB

2.What feature does the VxRail Sizing Tool provide to address node expansion?

- A. Automatic node discovery
- B. Predictive resource requirements
- C. Preconfigured network templates
- D. Dynamic fault domain adjustment

Answer: B

3.Which method can be used to discover VxRail nodes during deployment?

- A. Bootstrapping
- B. Node Auto-Discovery
- C. Distributed Resource Discovery
- D. IP Address Management

Answer: B

4.What is the recommended method for applying network configurations during VxRail setup?

- A. Manually assign IP addresses to nodes
- B. Use the VxRail Initial Configuration Wizard
- C. Preconfigure switches before running VxRail Manager
- D. Enable auto-configuration through vSphere Distributed Switch

Answer: B

5.What is the primary function of Live Optics in a VxRail deployment?

- A. Configures networking for VxRail nodes
- B. Monitors real-time cluster performance
- C. Collects workload data for sizing recommendations
- D. Manages disaster recovery solutions

Answer: C
